

Angel

Age 13

Before starting vision therapy I had many challenges. I had a struggle with reading because my eyes wouldn't come together and focus. With this happening, my eyes would get tired very quickly, making it harder for me to read. My eye doctor noticed that the reasons I was getting big headaches after school was because my eyes were working to come together. That is when I was sent to Brighter Future Vision Clinic.

My experience at home and in office with Brighter Future Vision was way better than I expected. I started my therapy thinking it was going to be boring. However, when I got used to it, it started being fun. My first visit there I thought I was going to be doing boring things. I was really relieved when I saw that all I had to do was play games and do activities.

My experience after vision therapy was really good. After school, I noticed I haven't been getting headaches at all. Now my eyes don't get tired quickly and I am faster at reading. At first, it took me a long time to take notes. Now I take them really fast. I was very impressed and I would recommend BFVC to some of my friends who have troubles.
