

Our Experience at Brighter Future

*Patient: Angel, Age 13
Written By Mother*

Pre-Vision Therapy Experience:

My daughter was struggling a lot with headaches and come to find out it had to do with her vision. She would come home exhausted and a lot of times take naps which isn't normal for her.

Computerized Vision Therapy Experience:

She did a great job with her home therapy. It was a little inconvenient at times, but well worth it.

Post Therapy Experience:

Angel is a lot more alert and energetic. She has not had any headaches lately and I give a lot of credit to her vision therapy.
