

## *Our Experience at Brighter Future*

*Patient: Angela, Age 9  
Written By Mother*

### *Pre-Vision Therapy Experience:*

*Angie used to love reading. She would always carry her book with her and read every opportunity she had. This last summer things changed. It was a constant struggle to get her to read. She would lose interest in the book and would find any excuse to not read. She also complained that she could not read text messages because the words were jumping.*

### *Computerized Vision Therapy Experience:*

*Both the home therapy and in-office programs were easy and beneficial. I did struggle a bit with Angie on the home portion of it, but Kevin was very helpful and encouraged Angie.*

### *Post Therapy Experience:*

*Angie's reading has improved. It is not where it was before, but I expect it will continue to improve. The other symptoms of the letters moving and struggling to read the board at school have diminished. Everybody in the VT program is great, helpful and full of information. I would recommend this program to everybody.*
