

Vision Therapy

Before vision therapy it was hard for me to read or write. In second grade I used to love reading I would take my book everywhere with me and read whenever I had a chance, but last summer I didn't want to read, I didn't like read. I was complaining that when I read a text message the words were jumping up and down. Then finally I met Kevin, Ali, Matt, and Gary they are so fun to be around they are funny and caring.

After vision therapy I went back to loving reading and when I read a text the words don't bounce but not only that I can take notes from the board in class faster. Thank you VT crew :)
