Age: 11 1/2

My Experience with Vision Therapy

Before I started vision therapy I did all these things: Holding a book too close to my face, not being able to see the board very well, not reading very fast or very good, and I couldn't see things that were far away.

On the first day of therapy it was hard to do a lot of it. But the more I did it, I got the hang of it and I got so much better! And the scores on my games got a lot higher! Now I feel like my eyes have changed so much. I feel like they are so much stronger than they used to be.

I love all the therapists. They are so funny, bright and just so much fun to work with. :D I'm going to miss them all and I'm sure you will miss them when you are done!! :)

And that's my vision therapy experience!!

P.S. - I'm sooo glad I went to Brighter Future Vision Clinic!!
