

Our Experience at Brighter Future

Patient: AnnaLia, age 11

Written by mother

Pre-Vision Therapy Experience:

She wasn't reading at grade level; she skipped lines and added words that were not there. She had trouble writing from the board at school.

Computerized Vision Therapy Experience:

It was really fun to work with the therapists. It felt like they really cared. The at home games were fun to play.

Post Therapy Experience:

All her issues disappeared. She feels like she can read so much better. I am happy with the program and would recommend this to others.
