

Our Experience at Brighter Future

*Patient: Autumn, Age 12
Written By Mother*

Pre-Vision Therapy Experience:

Autumn has been a challenging student to teach. She is very smart but has struggled more with reading than my other children. As a home school parent and teacher I wonder how many of her issues are related to her vision difficulties. She started complaining about "hurting eyes" and headaches. She was rubbing her eyes a lot during school time. We went to get her eyes checked and the doctor recommended Vision Therapy.

Computerized Vision Therapy Experience:

I think Autumn liked the exercises because she did not struggle with doing them. She would show her brother and he wanted to try them also.

Post Therapy Experience:

Autumn has fewer problems with school it seems. She has less headaches and complains less of hurting or itchy eyes.
