

## *Our Experience at Brighter Future*

Patient: Eva, age 6

Written by Father

### *Pre-Vision Therapy Experience:*

Eva's eyes got so tired. Last year in kindergarten she would come home and need a nap just to give her eyes a break. And she saw double when she got tired at the end of the day.

### *Computerized Vision Therapy Experience:*

Eva loves the in-office visits and tells me how fun they are! She really likes Kevin and Ali. They make it fun which is awesome! The computer program was way easier than the VT that we did in another office. It was manageable with school, homework, soccer, etc. The first VT session we did at another office would have been challenging to complete during school. And she had bigger gains at Brighter Future from what I can tell.

### *Post Therapy Experience:*

Eva is no longer seeing double. She is not nearly as tired at the end of her school day. She is doing an awesome job reading. I really liked VT at BFVC. Making VT fun greatly improved Eva's attitude towards it. No tears this time! We had too many tears during our first session at another office. I would definitely recommend VT and BFVC to others.
