

## *Our Experience at Brighter Future*

*Patient: Jarin, Age 9  
Written By Mother*

### *Pre-Vision Therapy Experience:*

*Jarin has struggled with his reading since kindergarten. His teacher noticed that Jarin would squint when trying to read. We took him to two Ophthalmologists who diagnosed no issues. He continued to have trouble reading and was placed on an IEP at school. He was falling further behind. We started to look into dyslexia when Dr. Rado suggested a consult with Brighter Future Vision and we are pleased with Jarin's progress.*

### *Computerized Vision Therapy Experience:*

*We found the staff at Brighter Future knowledgeable and organized. They have answered all our questions and have helped Jarin with his reading.*

### *Post Therapy Experience:*

*Our experience with Brighter Future Vision has been positive. Our son Jarin has been reading better and seems to be able to focus on words with accuracy. We received adequate information about the process.*
