1 Session of Vision Therapy

How Vision Therapy is Changing My Life

My teachers used to try to help me read by sitting closer to the blackboard. Now, thanks to Vision Therapy reading is easier and has helped me to pass reading tests. Vision Therapy helped me to look at the words on the chalkboard. It also helped me to see better than I used to.

My therapists were very nice and helped me to practice my lessons. They are fun and help me with interesting games and exercises. In the beginning, I did not think that Vision Therapy would help me, but towards the end it got better. Vision Therapy was fun and I hope to continue with the practice.

My eyes feel better and it is easier to focus on small words. I feel better about myself and thanks to Vision Therapy I do not feel that I am behind in school and I can keep up with my reading group.

I hope kids who have the eye issues like me will go to Vision Therapy to help them see better and to read small words.
