

## *Our Experience at Brighter Future*

*Patient: Kyla, Age 8  
Written By Mother*

### *Pre-Vision Therapy Experience:*

*Kyla had 2 eye surgeries before VT, but she still struggled with reading, depth perception, and headaches. She struggled in school with reading.*

### *Computerized Vision Therapy Experience:*

*We had a very positive experience with VT. Kyla was always excited to attend her sessions and she liked all her therapists. She had not been exposed much to video games, and she enjoyed them at home. She did have many headaches, but persevered through them.*

### *Post Therapy Experience:*

*After therapy, Kyla's headaches disappeared. She is reading much better and picking up reading skills at a faster pace. She is at grade level on an instructional level which is great progress. We appreciate the detailed information Dr. Johnson gave to help us understand what Kyla's eyes were doing and how they would work to fix the problems. Thanks to the office staff who answered our questions and always had smiles on their faces. We like how they always greeted our daughter when she arrived.*
