

Before I started Vision Therapy, I couldn't read outloud very well and I couldn't read in my head for very long, also school took a long time and I made a lot of errors. I couldn't copy of the board very well. Spelling was always hard.

After I started Home Therapy, I realized how fun it was. When I went into the office we played really fun games. It was fun when they joked. I had a really fun time.

After Vision Therapy, I can read outloud better and when I read in my head I can read all day. Also I read faster. When I do spelling tests I don't have very many wrong. Also school doesn't take very long and I don't have many errors. I would definitely recommend others.
