

How vision therapy is changing my world

By zina age 10

I couldn't see far away to the board, so I would have to look like a fool and go up to the board. After vision therapy I have been able to sit at my desk, without glasses, and I can see the board. Vision therapy has helped me in so many ways, I cant even get it into such a few words. Vision therapy is fun playing games with the "big kids", they are fun to laugh and play with, they make it really enjoyable. I have enjoyed these 10 weeks, and I am no longer as embarrassed. My concentration is much better and so my work is improving and also being more fun.

Thank you all for helping my sight improve...

Sincerely

zina
